Vape detectors in washrooms and changerooms

Vape detectors have been installed in all single gender washrooms and gym changerooms and will be operational starting next week. These detectors will alert administration when vape exhaust is detected. The time of the detection and location will be communicated to administration through an email that is sent at the time of detection.

Our school camera system covers the hallway outside of every washroom. This video footage will be used to determine who was in the washroom at the time the vape detector was activated. Our hope is that these devices will deter students from using vape products in school washrooms. Information will be communicated to students on Monday regarding the vape detectors.

Mental Health and Preparing for the Post Secondary

After high school, post-secondary education for our youth can be exciting but also stressful if they have struggled with their mental health. Learn from Dawn Schell from the University of Victoria and Melissa Feddersen from the University of British Columbia (Okanagan). Discover some ways we can prepare our youth for school, and support their mental health and independence while they are at school.

Join us and other families for this video presentation and discussion that's facilitated by a Family Smart Family Peer Support Worker.

12:00pm-1:30pm Pacific Time (British Columbia)

1:00pm-2:30pm Mountain Time (Alberta)

These events are funded for parents and caregivers living in the Province of British Columbia and for CASA families in Alberta. If you are from another province or territory, or live outside of Canada, we welcome you to visit our video library at www.familysmart.ca/videos and use our resources. Thank you.
